

include/filters.hpp

```
graph TD; A[include/filters.hpp] --> B[pcl/point_types.h]; A --> C[pcl/point_cloud.h];
```

The diagram illustrates a header file dependency. At the top, a grey rectangular box contains the text 'include/filters.hpp'. Two blue arrows originate from the bottom of this box and point downwards to two separate white rectangular boxes. The left box contains the text 'pcl/point_types.h' and the right box contains the text 'pcl/point_cloud.h'. This visualizes the concept of 'include/filters.hpp' including or depending on both 'pcl/point_types.h' and 'pcl/point_cloud.h'.
